The University of New Mexico

BBA in Marketing Management; Minor: Communication

Albuquerque, NM

12/2024

PROFESSIONAL EXPERIENCE

Information Technology Department, The University of New Mexico

Professional Intern (Full-Time)

Albuquerque, NM

02/2025 – 06/2025

Financial Analyst (Part-Time)

11/2021 – 12/2024

- Participated in designing an integrated financial analysis system to intelligently perform the periodic and ad hoc financial reporting tasks and significantly reduced at least 2 hours normally spent on repetitive data processing tasks
- Analyzed key financial information by performing statistical computation on financial data to develop revenue and expense insights for the organization to optimize the operation cost
- Gained proficiency in Accounts Payable, Financial Statements, Microsoft Excel, Spreadsheets, and Journal Entries

China Railway Materials Trading Co., Ltd

Business Data Analyst (Intern)

Beijing, China

06/2024 – 08/2024

- Managed and maintained an apricot database for over 100 customers and ensured the scalability to input and extract data
- Performed data analysis on various feature statistical aggregation for customers, suppliers, financial and risk information to evaluate the customers' value to make customized strategies
- Mined customer preference data on social network and cooperated to launch a 30-day subscription promotion event that earned over 80% subscription rate

Albuquerque Prospect Chinese Academy

Marketing Assistant (Part-Time)

Albuquerque, NM

09/2023 – 12/2023

- Captured the key information within the marketing data, and analyzed the campaign results including user participation, payment behavior and product preference to determine the influence from a quantitative perspective
- Analyzed the email campaign styles majorly adopted, and generated an email campaign to students' parents that resulted in \$10K in revenue and 50+ returning students

DATA ANALYTICS PROJECTS & CHALLENGES

Global Wine Market Investment & Sourcing Strategy (Tableau, Data Visualization)

San Diego, CA

- Built interactive dashboard analyzing 130,000+ wine reviews and macroeconomic data to guide sourcing and investment decisions for wine distributors
- Identified market segmentation patterns and pricing arbitrage opportunities across global wine markets through integrated analysis of quality ratings, production volumes, and GDP indicators
- Delivered actionable insights on supplier diversification and portfolio optimization strategies

Data Analysis and Data Visualization for NM Fresh Foods

Albuquerque, NM

- Extracted fresh food data from multiple dimensions including product, profit, supply chain, and shipping, and aggregated key information through VLOOKUP and Excel pivot tables
- Built regression models to forecast the company's future profit in Denver based on sales, market research and competition data, and predicted sales based on customer demographic, consumer preference, and competitor sales

KPMG Human Resource Data Consulting Project

Albuquerque, NM

- Processed the raw human resource data on the turnover rate for different North American divisions to ensure consistency within the data by removing outliers, filling in missing values, and standardizing numbers
- Performed the data observation by examining the distributions, correlations and trends on gender, age, race, degree and choice after leaving the company with Excel charts and pivot tables
